

Adding a Web Link page

This will allow you to guide your students to webpages you use within your classroom.

1. Using your web browser find the link you want to make available to students.
2. Copy the link (select and right click) ***make sure you select the entire link

3. Go back to your class in Blackboard
4. Open the appropriate folder
5. Click on build content and choose Web Link
6. In the Name box type a name for the link that is understandable to your students
7. URL - paste the address of the website here.
**note you must copy and paste the entire link including the http
8. You can add instructions in the text section of description
9. You can also attach a document with the link if you have an assignment that goes with the site.
